2. Full sides packaging

The packaging solution=

Film covering machine+wrapping machine+out feed conveyer.

It providing a better protection for your door. The film covering device is able to adopt PE film, bubble film which cutting film by sealer.

3. Special points need to be know about door packaging.

a. Door shape

• With glass

With concave-convex

Flat door

b. With or without frame and hardware

For different door packaging requirement, there is not to modify the machine accordingly for protect the door and the better packaging.

Beuase of some designing is no ok for door package.

(1)Such as cylinder to press the door is only work for flat door.

By cylinder press down, it will damage the glass, it can no pass the concave-convex area, it is no ok for door with frame.

(2) Conveyor

PVC Belt is better than roller conveyor to protect the surface of door.
